ABSTRACT

Ježek J.: **New taxa of non-biting moth flies (Diptera, Psychodidae, Psychodinae, Paramormiini) from Madagascar**

An account of the Psychodinae, tribe Paramormiini, from Madagascar is given, containing a description of the new genus *Psychomasina*. Three new species are described: *Clogmia bidentata*, *Paramormia fluviatilis* and *Psychomasina armata*. One new combination in *Clogmia* is suggested. All important diagnostic characters are illustrated and differential diagnoses are given, and comments on the generic classification are added.

Key words: taxonomy, new genus, new species, new combination, Psychodidae, Psychodinae, *Clogmia*, *Paramormia*, *Psychomasina*, Afrotropical Region
