ABSTRACT

Michalska Z., Dreger M. & Myssura M.: **Agromyzidae (Diptera) of alien shrubs in Poland**

So far, 11 species of Agromyzidae have been recorded on alien shrubs in Poland. The latest, unpublished results of observations made in the Botanical Garden in Poznań, enriched the lists of host plants of *Agromyza spiraeoidearum*, *Aulagromyza caraganae* and *A. luteoscutellata*.

Key words: Diptera, Agromyzidae, mining dipterans, trophic specialization, distribution, Poland
