### ABSTRACT

Púpavová, Z. & Gáperová, S.: **Infrequent woody plants in chosen parks of Central Slovakia**

The data about infrequent woody plants in chosen parks in three urban sites (the towns of Banská Bystrica and Veľký Krtíš and the village of Dolná Strehová respectively) from Central Slovakia are given. From chosen 35 infrequent woody plants had highest social value *Quercus robur* L. and *Pinus nigra* Arn. From the village of Dolná Strehová. These two woody plants would be protected.

**Key words:** infrequent woody plants, park, Central Slovakia, social value of woody plants
